UTICA TOOL CO., INC. Subsidiary  The Triangle Corporation

## HISTORY OF UTICA

ORANGEBURG, S. C. 29115

Back in 1895, just three years before the Spanish-American war, the first forging hammers of Utica Drop Forge & Tool began their deep booming chorus which for over 80 years has told the world a factual story of forging skill.

From a modest beginning, with a handful of employees, has grown an organization producing the most complete line of hand tools accepted by industry and individuals throughout the world.

Utica Drop Forge & Tool was founded by W. Pierrepont White and Hugh White to manufacture "nippers". In 1907, the original plant burned to the ground, and in 1908, a complete line of pliers went into manufacturing under the new roof. Around 1923, the late W. E. Lewis bought control of the company, and in 1940, employment jumped from 130 to 535, while the company produced 5,000,000 armor piercing shell cap forgings, along with a variety of special tools such as 6" linemans pliers for the Defense Department.

In 1956, Utica Drop Forge & Tool was purchased by the Kelsey-Hayes Company of Detroit, Michigan, now a division of Fruehauf Co. Under the guidance of Kelsey-Hayes, it became a leading producer of specialized pliers for industry. It also became a high ranking manufacturer of commercial pliers, and adjustable wrenches.

In 1961, the Herbrand Automotive Tool Line, established in 1876, was purchased from Bingham-Herbrand Corporation of Fremont, Ohio. All machinery, inventory, and supervisory personnel at the Herbrand Plant were moved to Utica, New York.

Utica-Herbrand Tool Division of Kelsey-Hayes Company moved to Orangeburg in the summer of 1962 from Utica, New York.

Kelsey-Hayes added Bonney tools to the automotive line in April, 1964, when the line was purchased and moved from Alliance, Ohio, into a new addition to the Orangeburg Plant.

In September, 1967, Kelsey-Hayes sold the Hand Tool Division to The Triangle Corporation. At that time the Company was renamed Utica Tool Company, Inc. and is operated as a wholly owned Subsidiary of The Triangle Corporation with headquarters in Stamford, Connecticut.

Triangle acquired Torque Controls, Inc. in 1968 and moved all manufacturing facilities from South El Monte, California to Utica's Orangeburg factory in 1970. The Torque group manufactures a full line of click, dial, and pre-set torque wrenches, in addition to torque screwdrivers, testers and calibrators consisting of 81 different items sold under the name of Utica.

Utica has employment of approximately 800 people, constituting an annual payroll of over \$6,000,000.

The total number of standard pliers manufactured in our plant is approximately 200 standard models and over 1,000 custom models made to customers' specifications. Our automotive line includes over 1,200 different catalogue items. Utica Tool Company now produces an average of 50,000 tools per day and have over 2,000,000 parts in process on the floor. The above tools are sold under the brand names of Utica/Bonney.

Utica Tool Company believes that the fully air-conditioned building, approximately 300,000 square feet, the machinery it houses, and the people who work here are the finest in the world for the manufacturing of hand tools. We have a reputation of making the highest quality tools in the world today, and we intend to make that reputation even better.

## OUR CORPORATE PLEDGE TO YOU

We the employees of Utica Tool Company are dedicated to the achievement of our pride and satisfaction through the accomplishment of our company goals:

- Producing professional hand tools of high quality.
- Serving our customers in a reliable and responsible manner.
- Marketing our tools through the Automotive aftermarket, the Industrial market, and the International markets.

*And in so doing, to make a good and fair profit to the benefit of ourselves, our shareholders, and our community.*

Feel free to call on us at any time, for any reason. You will find Utica people a team you can depend on.

### UB-77HT CATALOG

UTICA/BONNEY is proud to bring you, our customers, this new UB-77HT combined hand tool catalog. This new catalog features a sub divided quick index page tab by section number that allows you to find the tool or tools you are looking for in quick time. (See Quick Index Below). The catalog illustrates our complete line of standard, special purpose, industrial and automotive type tools. For our complete line of hand tool boxes, professional roller cabinets and chests see Catalog UB 77-B.

Our NIDA-SIDA Manufacturer's Code No. 783894.

### QUICK INDEX

Section No.	Categories	Find On Pages
1	Electronic Pliers	9 thru 12
2	Pliers	13 thru 22
3	Telephone and Electrical	23 thru 26
4	Aerospace and Special Sockets	27 thru 28
5	Power and Impact	29 thru 30
6	Socket Sets	31 thru 40
7	Sockets, Handles & Attachments	41 thru 51

Section No.	Categories	Find On Pages
8	Metric Tools & Sets	52 thru 54
9	Wrench Sets	55 thru 58
10	Wrenches	59 thru 63
11	General Service Tools	64 thru 77
12	Air Conditioning Service	78 thru 80
13	Torque Products	81 thru 92
14	Merchandising	93 thru 94

### BONNEY BRAND (AUTOMOTIVE) DISTRIBUTION POLICY AND SALES REPRESENTATION

As in the past, Bonney will continue to recognize and support the traditional system of distribution through Warehouse Distributors and Jobbers. We are proud to number the leaders in these fields among our customers.

Bonney's Field Representatives and stocking Warehouses are to be found in every trading area. These Warehouses provide tool stocks at convenient, centrally located points. Our Field Representatives offer their cooperation in meeting every tool need.

### UTICA BRAND (INDUSTRIAL) DISTRIBUTION POLICY AND SALES REPRESENTATION

Utica products are sold through selected industrial distributors. Our distributors are Utica's greatest asset because of the value they add to our Marketing Program. Utica distributors make your job easier by performing services. Carrying inventories, Supplying product information, Extending Credit, paperwork and transportation.

Rendering emergency assistance to minimize down time.

Utica distributors reduce our selling cost and allow us to do the work we do best, the design and manufacture of quality hand tools.

Full information regarding our distribution, sales representation, tools or tool problems can be secured by writing or calling the address below: Attn. Automotive Sales Manager or Attn. Industrial Sales Manager.

# Loc-Rite® and only Loc-Rite wrenches use this entirely new turning principle

Utica Loc-Rite wrenches and sockets work on a revolutionary principle that prevents leaks, fastener damage, distortion, or false torque readings. Instead of tightening by pressing inward, Loc-Rite wrenches exert pressure tangentially, from the sturdy hex flats around the shoulder of the fitting.

Because a Loc-Rite wrench bears on hex flats instead of hex points, there is no damage to fasteners, no out-of-round condition developed even during high-torque wrenching of thin wall fasteners or soft metals. So there is no galling of threads, no undue thread friction, no false torque readings—and no leakage from incorrectly tightened fittings.!

Another advantage of Loc-Rite tangential force is that you can use a Loc-Rite wrench to loosen and possibly re-use a fitting so badly damaged that conventional wrenches will no longer turn it! Even if the hex points have been crushed, a Loc-Rite wrench will work, since it snugs deep into hex flats.

Utica Loc-Rite tools meet the most exacting assembly and repair needs in aerospace, hydraulics, automotive—wherever performance and dependability count. Once you try a Loc-Rite wrench or socket, you'll never want to use conventional tools again!

**All conventional wrenches can crush fittings as they tighten them.**

*\*PATENT NO. 3125910*

All conventional wrenches use these outmoded crushing principles—only Utica-Bonney Loc-Rite tools apply a new, exclusive wrenching concept.

Look at the conventional open end wrench (left). When used, it exerts inward force at two points on the fitting. Result: hex points can be rounded off as force is applied . . . the wrench may slip, and the fasteners may not attain the necessary torque. The uneven pressure exerted by this old-fashioned wrench can also gall threads and sealing surfaces, causing leakage.

The conventional flare nut wrench (right) is a slight improvement. It bears on four points, not two. But the basic problem is the same: it bears on the vulnerable hex points, to turn with an inward crushing force that can damage fasteners during severe application.

A false torque-tension relationship may also be created. Fasteners torqued with conventional wrenches may be damaged before desired readings are achieved . . . or the apparent "tightness" of distorted fasteners may result in leakage when the distorted fastener returns toward "round" after the wrench is disengaged.

When the applied force is really a crushing force directed toward the center of the fitting, the result may be out-of-roundness or mutilation. Such a fitting, once tightened imperfectly, may prove almost impossible to remove if heads have been damaged. Thin-wall fittings are especially susceptible to galling during tightening, which can cause abnormal thread friction, false torque readings, and internal damage.

# TOOL HIGHLIGHTS

## LOC-RITE®

- **no other wrenches can duplicate**
- Prevent mutilation and distortion of fasteners.
- Prevent hydraulic, pneumatic and gas leaks caused by fastener distortion.
- Remove bolts and nuts even if corners are damaged by conventional wrenches.
- Permit accurate torque tension relationship.
- Provide up to 20% more clamping force.
- Reduce warranty costs and downtime caused by malfunction of vital parts . . . reduce customer complaints and ill-will.
- Reduce service call-backs.
- Permit frequent re-use even of damaged fasteners.

## WRENCH FINISHES

FULL POLISH

SATIN FINISH

**FULL POLISH:** This wrench is ideal for the professional who wants a mirror finish tool. A series of specialized finishing operations preceding plating produces the finish on this high quality tool line.

**SATIN FINISH:** This finish is preferred by some professionals because of the unpolished handle giving them a slip resistant gripping area. This finish is our more economically priced line.

## REVERSIBLE RATCHETS

- Single wing steel shifter for reverse ratcheting.
- Double pawl construction.
- Knurled handle provides safe grip.
- Single unit gear assembly. Entire mechanism easily removed for cleaning.
- (36) Teeth Give (72) Tooth Action with our double pawl.
- This is equivalent to 5° of arc-indexing.
- Finish: Nickel chrome plate over full polish.

## ADJUSTABLE WRENCHES

- **Re-designed movable jaw has maximum bearing and strength with minimum side play.**
- **Hardened knurl for fingertip adjustment of jaw opening.**
- **Nickel chrome plate for corrosion free service.**
- **Optional cushion handles for comfort.**

## TRADEMARKS

Following are the registered trade marks under which we manufacture and sell our products:

UTICA No. 523, 494

UTICA/BONNEY CAM-LOCK

RIB JOINT No. 673, 479

BONNEY No. 68, 202

STRIPWRIGHT No. 875, 596

LOCRITE No. 789, 030

WOBBLE DRIVE No. 565, 137

# UTICA PLIERS

## FORGINGS

### CASTING

NO FIBER STRUCTURE

### STAMPING

STRAIGHT FIBERS CUT OFF

### FORGING

FIBERS FOLLOW CONTOUR

Forgings are best. Utica has had many years of forging experience in which to perfect the art of forging. Forged tools are stronger because the grain of the metal follows the contour of the tool. See illustration.

## RIVET AND JOINT

The plier joint is by far the most important part of the plier. If the joint is loose, the edges will not align and will quickly dull or chip. Utica utilizes a forged rivet which gives the toughness of a forging and a precision fit far superior to the machined rivet method.

## HEAT-TREATING

Utica utilizes a unique heat treating method known as induction hardening. This method allows selective hardening to insure hard edges, tough jaws and elastic handles.

## FINISH & CUSHION GRIPS

Utica offers many different finishes allowing cost savings to you. Comfort fitting plastisol handles are offered in many colors. Red is standard. Dielectric value not guaranteed.

## SERRATED OR SMOOTH JAWS

Utica pliers are available with serrated jaws for the sure grip application and smooth radiused jaws for delicate no-nick application.

## CUTTING EDGES

### Utica Offers Three Edge Types.

**FLUSH** - For Close Flat Cuts - Soft Wire Only.  
**SEMI-FLUSH** - For close cutting of medium hard wire.  
**REGULAR** - For cutting hard wire. Not for very high tensile wire.

## RIB-JOINT UNDERCUT

OLD STYLE NEW STYLE

Utica's rib joint pliers incorporate a special machined undercut beneath the bottom edge of the jaw position rib. This undercut allows positive non-slipping and gripping action under applied pressure.

## N-THROAT

Our N Throat plier manufacturing process allows us to affix a specially formulated plastisol cushion to the jaws of many standard line or custom pliers by using a special oven baking process. This safety device allows pliers to retain short end of wire during and after cutting, preventing wire from flying into delicate or critical work areas.

## CUSTOM TOOLS

We solicit Special tool inquiries covering your requirements for Special or Custom Built tools.

Full information regarding Special tools or tool problems may be secured from Utica Tool Co. Inc., Cameron Road, Orangeburg, South Carolina 29115. Phone 803-534-7010, Telex: 57-3498. Attn.: Industrial Sales Manager.

H - FINE SERRATED JAWS

J - FLUSH EDGES  
K - SEMI-FLUSH EDGES  
R - RADIUS ON JAWS  
S - COIL SPRING IN HANDLE  
N - CUSHION THROAT

## No. 34 LONG HANDLE DIAGONAL CUTTING PLIER

Hand honed semi-flush edges, thin narrow nose and long reach handles make this the ideal plier for those tough applications in hard to reach areas where a clean cut is required. Cuts soft drawn wire from No. 30 to No. 20 gauge with a maximum tensile strength of 90,000 psi. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
34-6 CFKS	13246-00	$1\frac{5}{32}$	$2\frac{7}{64}$	$\frac{7}{32}$	.172 lb.

## No. 38 DIAGONAL CUTTING PLIER

Semi-flush edges plus extra thin nose are ideal for work in congested areas. The perfect tool for printed circuit and telephone work. Cuts soft drawn wire from No. 28 to No. 22 gauge with a maximum tensile strength of 90,000 psi. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
38-4 CKS	13224-11	$1\frac{5}{32}$	$2\frac{7}{64}$	$\frac{7}{32}$	.104 lb.

## No. 42 DIAGONAL CUTTING PLIER

Hand honed flush-edge with tapered nose. Heavy pattern joint for long life. Ideal for printed circuit and other electronic applications. Cuts soft drawn wire from No. 30 to No. 19 gauge with a maximum tensile strength of 90,000 psi. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
42-4 J	13124-00	$\frac{5}{8}$	$\frac{9}{16}$	$1\frac{1}{32}$	.177 lb.
42-4 JC	13124-10	$\frac{5}{8}$	$\frac{9}{16}$	$1\frac{1}{32}$	.177 lb.
42-4 JCS	13124-11	$\frac{5}{8}$	$\frac{9}{16}$	$1\frac{1}{32}$	.177 lb.
42-4 JCFS	13124-22	$\frac{5}{8}$	$\frac{9}{16}$	$1\frac{1}{32}$	.177 lb.

## No. 44 DIAGONAL CUTTING PLIER

Hand filed semi-flush edges plus thin narrow nose make this plier ideal for trimming printed circuit boards and electronic components, cuts No. 28 to No. 12 gauge. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
44-5 K	13145-00	$\frac{3}{4}$	$\frac{5}{8}$	$\frac{3}{8}$	.250 lb.
44-5 KC	13145-10	$\frac{3}{4}$	$\frac{5}{8}$	$\frac{3}{8}$	.250 lb.
44-5 KCS	13145-11	$\frac{3}{4}$	$\frac{5}{8}$	$\frac{3}{8}$	.250 lb.
44-5 KCSF	13145-22	$\frac{3}{4}$	$\frac{5}{8}$	$\frac{3}{8}$	.250 lb.

## No. 46 DIAGONAL CUTTING PLIER

Hand filed semi-flush edges plus thin narrow nose make this plier ideal for close-quarter electronic circuitry work, also very popular in the telephone industry. Cuts hard drawn wire from No. 28 to No. 22 gauge with a maximum tensile strength of 150,000 psi. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
46-4 K	13214-00	$1\frac{5}{32}$	$2\frac{7}{64}$	$\frac{1}{4}$	.125 lb.
46-4 KC	13214-10	$1\frac{5}{32}$	$2\frac{7}{64}$	$\frac{1}{4}$	.125 lb.
46-4 KCF	13214-12	$1\frac{5}{32}$	$2\frac{7}{64}$	$\frac{1}{4}$	.125 lb.
46-4 KCS	13214-11	$1\frac{5}{32}$	$2\frac{7}{64}$	$\frac{1}{4}$	.125 lb.
46-4 KCSF	13214-22	$1\frac{5}{32}$	$2\frac{7}{64}$	$\frac{1}{4}$	.125 lb.
46-4 CSJ	13214-25	$1\frac{5}{32}$	$2\frac{7}{64}$	$\frac{1}{4}$	.125 lb.

## No. 47 DIAGONAL CUTTING PLIER

Hand honed flush-edge for close burr free cutting plus the thin pointed nose are ideal for all around cutting of electronic component leads. Cuts soft drawn wire from No. 30 to No. 20 gauge with a maximum tensile strength of 90,000 psi. Standard light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
47-4 J	13234-00	$\frac{1}{2}$	$2\frac{7}{64}$	$\frac{9}{32}$	.104 lb.
47-4 JC	13234-10	$\frac{1}{2}$	$2\frac{7}{64}$	$\frac{9}{32}$	.104 lb.
47-4 JCS	13234-11	$\frac{1}{2}$	$2\frac{7}{64}$	$\frac{9}{32}$	.104 lb.
47-4 JCFS	13234-22	$\frac{1}{2}$	$2\frac{7}{64}$	$\frac{9}{32}$	.104 lb.
47-5 J	13235-00	$2\frac{3}{32}$	$\frac{5}{8}$	$\frac{3}{8}$	.233 lb.
47-5 JC	13235-10	$2\frac{3}{32}$	$\frac{5}{8}$	$\frac{3}{8}$	.233 lb.
47-5 JCF	13235-11	$2\frac{3}{32}$	$\frac{5}{8}$	$\frac{3}{8}$	.233 lb.
47-5 JCFS	13235-22	$2\frac{3}{32}$	$\frac{5}{8}$	$\frac{3}{8}$	.233 lb.

# ELECTRONIC PLIERS

## No. 66 TIP CUTTING PLIER

Hand honed flush edges with alignment pin for true flush cutting. Special long nose design and angle of edge allows comfortable tip cutting position. Cuts soft drawn wire from No. 30 to No. 20 gauge with a maximum tensile strength of 90,000 psi. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
66-5 CJS	15165-00	$\frac{29}{32}$	$\frac{1}{2}$	$\frac{19}{64}$	.133 lb.
66-5 CJSF	15165-22	$\frac{29}{32}$	$\frac{1}{2}$	$\frac{19}{64}$	.133 lb.

## No. 141 DIAGONAL CUTTING PLIER

Hand honed flush edges and tapered nose are ideal for electronic and telephone work where flush cuts are essential. Cuts wire from No. 30 to No. 20 gauge with a maximum tensile strength of 90,000 psi. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
141-5 J	13175-00	$\frac{25}{32}$	$\frac{5}{8}$	$\frac{25}{64}$	.250 lb.
141-5 JC	13175-10	$\frac{25}{32}$	$\frac{5}{8}$	$\frac{25}{64}$	.250 lb.
141-5 JCS	13175-11	$\frac{25}{32}$	$\frac{5}{8}$	$\frac{25}{64}$	.250 lb.

## No. 146 DIAGONAL CUTTING PLIER CARBIDE EDGES

Precision ground carbide semi-flush edge designed especially for long life in the electronics field for trimming of component leads. Will cut nickel, kovar, dumet to .030 dia., and other abrasive wires up to No. 22 gauge having a maximum tensile strength of 150,000 psi. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
146-4 CKS	13164-00	$\frac{1}{2}$	$\frac{27}{64}$	$\frac{17}{64}$	.125 lb.

## No. 347 SLIM-LINE DIAGONAL CUTTING PLIER

Hand honed flush edge with very small joint and nose for areas of limited accessibility. Especially designed for intricate electronic modules and circuitry. Cuts soft drawn wire from No. 30 to No. 20 gauge with a maximum tensile strength of 90,000 psi. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
347-4 CFJS	13847-00	$\frac{3}{8}$	$\frac{23}{64}$	$\frac{7}{32}$	.075 lb.

## No. 753 TRANSVERSE END CUTTER

Semi-flush ground cutting edges allow close cutting of component leads. Ideal for cutting in very close quarters where other cutters cannot reach. Cuts soft copper wire up to No. 20 gauge. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
753-4 CKS	15134-00	1	$\frac{7}{8}$	$\frac{17}{64}$	.146 lb.
753-4 CKSF	15134-22	1	$\frac{7}{8}$	$\frac{17}{64}$	.146 lb.

## No. 754 DIAGONAL CUTTING PLIER

Flush cutting edges for perfect cuts. 60° angle of jaws allows maximum accessibility when trimming component leads and welded modules. Allows positive tip cutting in confined areas. Cuts nickel ribbon and copper wire up to No. 20 gauge. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
754-4 CJS	15226-00	$\frac{7}{16}$	$\frac{27}{64}$	$\frac{3}{8}$	.125 lb.
754-4 CJFS	15226-22	$\frac{7}{16}$	$\frac{27}{64}$	$\frac{3}{8}$	.125 lb.

# ELECTRONIC PLIERS

## No. 792 TIP CUTTING PLIER

For very fine wire. The full-flush cutting edge is designed to cut at extreme tip. Tapered jaws allows cutting in confined areas. Recommended for No. 24 soft copper wire or smaller. Honed cutting edges are sharp and accurate. They will stay sharp longer because they are induction hardened. Beautiful precision finish. Standard with light green cushion handles.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
792-4 CFJS	13254-00	1/2	27/64	17/64	.104 lb.

## No. 22 SHORT CHAIN NOSE PLIER

Used for precision pickup, looping and twisting. Standard with red cushion handles.

Catalog No.	E.D.P. No.	Dimensions				Wt. Ea.
		A	B	C	D	
22-4 1/2 G	16111-00	1 1/8	7/16	9/32	1/16	.146 lb.
22-4 1/2 GC	16111-10	1 1/8	7/16	9/32	1/16	.146 lb.
22-4 1/2 GCS	16111-11	1 1/8	7/16	9/32	1/16	.146 lb.
22-4 1/2 GCSF	16111-22	1 1/8	7/16	9/32	1/16	.146 lb.
22-4 1/2 HCS	16111-24	1 1/8	7/16	9/32	1/16	.146 lb.
22-5 H	16115-00	1 1/8	9/16	2 1/64	1/16	.208 lb.
22-5 HC	16115-10	1 1/8	9/16	2 1/64	1/16	.208 lb.

22-6 HC	16116-10	1 1/8	1 1/16	7/16	1/16	.333 lb.

## No. 25 BENT CHAIN NOSE PLIER

Precision jaws are with radiused edges. Jaws are bent at 60° for gripping, twisting and looping fine wires in confined areas. Designed especially for very fine wire. Standard with blue cushion handles.

Catalog No.	E.D.P. No.	Dimensions				Wt. Ea.
		A	B	C	D	
25-5 CFHS	16135-00	1 1/8	1 3/32	1/4	3/64	.146 lb.
25-5 CFGRS	16135-43	1 1/8	1 3/32	1/4	3/64	.146 lb.

## No. 265 WIRING PLIER WITH CUTTER

Precision knife and anvil type edge plus serrated tips are ideal for delicate electronic sub assembly work where cutting, looping and twisting of solid or stranded wire is essential. Bends wire to No. 16 gauge. (TS 90,000 psi) cuts wires from No. 24 gauge to No. 19 gauge. (TS 90,000 psi). Standard with beige cushion handles.

Catalog No.	E.D.P. No.	Dimensions				Wt. Ea.
		A	B	C	D	
265-5 CS	14855-00	1 1/8	9/16	5/16	1/16	.146 lb.

## No. 654 LONG CHAIN NOSE WITH SIDE CUTTER

Spring tempered fine serrated jaws with extra-hardened jaw surfaces and cutter edges are ideal for electronic sub assembly work. Cuts soft drawn wire from No. 26 to No. 14 gauge with a maximum tensile strength of 90,000 psi. Cat. No. 654-5 1/2 comes with beige handles only. All others red handles.

Catalog No.	E.D.P. No.	Dimensions					Wt. Ea.
		A	B	C	D	E

## No. 896 WIRING PLIER WITH CUTTER

Precision knife and anvil type edge serrated tips and specially shaped nose are ideal for radio and TV sub assembly work. For cutting, looping and bending soft drawn wire. Cuts wire from No. 24 to No. 19 gauge. Bends up to .062" diameter with a maximum tensile strength of 90,000 psi. Standard with beige cushion handles.

Catalog No.	E.D.P. No.	Dimensions				Wt. Ea.
		A	B	C	D	
896-6 CS	14536-11	1 <sup>1</sup> / <sub>16</sub>	1 <sup>1</sup> / <sub>16</sub>	7/ <sub>16</sub>	1/ <sub>16</sub>	.333 lb.

## No. 1033 LONG CHAIN NOSE PLIER

Spring tempered jaws are specially designed for gripping small wire and components without damaging. Cat. No. 1033-5<sup>1</sup>/<sub>2</sub>H comes with blue handles. All others are red.

Catalog No.	E.D.P. No.	Dimensions				Wt. Ea.
		A	B	C	D	
1033-5 <sup>1</sup> / <sub>2</sub> H	16215-00	1 <sup>25</sup> / <sub>32</sub>	1/ <sub>2</sub>	1 <sup>9</sup> / <sub>16</sub>	3/ <sub>16</sub>	.187 lb.

## No. B-5317 THIN CHAIN NOSE PLIER - 5"

Extra thin nose. Unscored radiused jaws for sub miniature work. Designed for application where wire or component must not be nicked or scratched. Standard with blue cushion handles.

Catalog No.	E.D.P. No.	Dimensions				Wt. Ea.
		A	B	C	D	
B5317 CFGRS	75317-00	1 <sup>1</sup> / <sub>8</sub>	1 <sup>3</sup> / <sub>32</sub>	1/ <sub>4</sub>	5/ <sub>16</sub>	.146 lb.

## No. B-5318 NEEDLE NOSE PLIER - 5<sup>1</sup>/<sub>2</sub>"

Long needle nose jaws are radiused and unscored for delicate electronic assembly work. Designed to give maximum holding without marking wire or component. Standard with blue cushion handles.

Catalog No.	E.D.P. No.	Dimensions				Wt. Ea.
		A	B	C	D	
B5318	75318-00	1 <sup>3</sup> / <sub>4</sub>	1/ <sub>2</sub>	1/ <sub>4</sub>	3/ <sub>16</sub>	.144 lb.

# PLIERS

## No. 7 COMBINATION SLIP JOINT PLIER CHROME PLATED

Fed. Spec. GGG-P-00471

Type II, Class 2, Style A (6", 8" & 10" sizes).

A quality tool, slip joint style with wire cutter. Knurled handles. Drop forged. Nickel Chromium plated.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
7-6	11126	1 <sup>3</sup> / <sub>32</sub>	1 <sup>3</sup> / <sub>16</sub>	1 <sup>3</sup> / <sub>32</sub>	.417 lb.
7-8	11128	1 <sup>5</sup> / <sub>16</sub>	1 <sup>1</sup> / <sub>4</sub>	7/ <sub>16</sub>	.646 lb.
7-10	11120	1 <sup>33</sup> / <sub>64</sub>	1 <sup>1</sup> / <sub>2</sub>	23/ <sub>64</sub>	1.063 lb.

## No. 8 COMBINATION SLIP JOINT PLIER POLISHED AND CHROME PLATED

A slip joint plier with wire cutter made from special steel, drop forged, machined and hardened by special methods to meet the needs of the most particular. Knurled handles. Polished Nickel Chromium.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
8-6	11136	1 <sup>3</sup> / <sub>32</sub>	1 <sup>3</sup> / <sub>16</sub>	1 <sup>3</sup> / <sub>32</sub>	.417 lb.

## No. 9 BENT THIN NOSE COMBINATION SLIP JOINT PLIER—POLISHED—PLATED

Nose is bent at 30-degree angle for special work. Teeth exceptionally sharp and strong. Slip joint style with wire cutter. Knurled handles. Polished Nickel Chromium.

Catalog No.	E.D.P. No.	Dimensions			Wt. Ea.
		A	B	C	
9-6	11176	1 <sup>1</sup> / <sub>16</sub>	1 <sup>3</sup> / <sub>16</sub>	7/ <sub>32</sub>	.417 lb.

## No. 11 THIN NOSE COMBINATION SLIP-JOINT PLIER—POLISHED—PLATED

Fed. Spec. GGG-P-00471

Type II, Class 2, Style B

Forged steel, chromium plated, knurled handles. Case hardened bolt and nut. Thin nose and sharp teeth make it especially useful in tight places. Jaws have wire cutter.

## BLOCKING TOOL

The blocking tool is used for blocking for extended periods the 221, 222, 223, 224, 247, and 248 relays on step by step switches.

Catalog No.	E.D.P. No.	Wt. Ea.
CT-16369	79993	.032 lb.

## PORTABLE LAMP

Operates on either 24 or 48 volt central office batteries.

The CT-14761 lamp is supplied with a 14 ft. cord and is equipped with a (310 plug) operator type plug.

Catalog No.	E.D.P. No.	Cord Type	Wt. Lb.
CT-14761	79988-01	14'/310 Plug	1.000
CT-14762	79988-02	8'/Clips	1.000
CT-14760	79988-05	W/O Cord	.500

## OIL CAN

Has special non-conductive spout and controlled portion oil release.

Catalog No.	E.D.P. No.	Wt. Ea.
CT-14796	79989 Weco	.688 lb.
CT-14700	79987 Reg.	.750 lb.

## B-WRENCH KIT—3/8" SQUARE DRIVE

Used to open and close splice cases. Consists of two deep sockets 7/16" and 9/16" respectively, with an extension to use where necessary. In metal box.

Catalog No.	E.D.P. No.	Wt. Ea.
UT-7667-B	82250	1.875 lb.

## TOOL TIP:

Do not use punches and chisels with mushroomed heads. And to prevent scraped knuckles use a punch and chisel holder.

NOTE: FOR WARRANTY SEE PAGE 95.

# TELEPHONE AND ELECTRICAL TOOLS

## LINESMAN SOCKETS 1/2" Sq. Drive

Power type sockets of high strength design with retaining ring in nut end for holding ferrous and non-ferrous fasteners.

Catalog No.	Size	E.D.P. No.	Wt. Ea.
LSP-3216L	1/2"	32416-17	.625 lb.
LSP-3218L	9/16"	32418-17	.630 lb.
LSP-3220L	5/8"	32420-17	.635 lb.
LSP-3222L	11/16"	32422-17	.650 lb.
LSP-3224-L	3/4"	32424-17	.750 lb.

LSP-3228-L	7/8"	32428-17	.850 lb.
LSP-3232-L	1"	32432-17	.938 lb.

## D-WRENCH KIT—3/8" Sq. Drive

Consist of reversing ratchet, a 3/8" socket, 7/16" socket, 1/2" socket, 9/16" socket, an extension, a 3/16" hex screwdriver, a 9/16" combination wrench.

Catalog No.	E.D.P. No.	Wt. Ea.
UT-8381-D	82251	2.500 lb.

## LINESMAN RATCHET—1/2" Sq. Drive

Has large shifter bar to permit reversing when wearing bulky gloves.

Catalog No.	E.D.P. No.	Wt. Ea.
A-702KL	41435	1.500 lb.

## CABLE SHEATH STRIPPER

For stripping the jacket from all sizes of plastic and fabric covered cable.

Catalog No.	E.D.P. No.	Wt. Ea.
CT-2878	18809	.500 lb.

### REPLACEMENT BLADES

Catalog No.	E.D.P. No.	Wt. Ea.
CT-2878-2	18809-02	.005 lb.

## CABLE TRIMMER

For "Ring" cutting the sheathing of INSIDE TYPE plastic, fabric or rubber covered cable. Two cutting blades are provided one for .020" thick insulation and the other for .030" insulation.

Catalog No.	E.D.P. No.	Wt. Ea.
CT-2060	18810	.250 lb.

### REPLACEMENT BLADES

Catalog No.	Depth of Cut	E.D.P. No.	Wt. Ea.
CT-2060-11	For .020	18810-20	.050 lb.
CT-2060-8	For .030	18810-30	.060 lb.

## No. 110 WIRE STRIPPING PLIER

Handles up to No. 10 wire.

V notches nick insulation for clean, fast stripping of wire. Face ground edges cut soft wire up to No. 10 gauge. With yellow cushion grips.

Catalog No.	E.D.P. No.	Wt. Ea.
110-5C	15515-00	.164

## WIRE STRIPPER

Gripping jaws hold wire while stripping jaws strip insulation making the strip a simple one-hand operation. Has adjustable strip length stop and cam adjustment for stripping wires from No. 12 to No. 26 gauge size.

Catalog No.	E.D.P. No.	Wt. Ea.
SW-1	18801	.345 lb.
SW-1L Lock	18802	.375 lb.

## 2 IN 1 COMBINATION CABLE TRIMMER STRIPPER

Butts and strips insulation on all sizes of plastic, fabric or rubber covered cable. Adjustable blade for .020 or .030 thick insulation.

Catalog No.	E.D.P. No.	Wt. Ea.
CT-2860	18811-00	.189 lb.

## LONG CHAIN NOSE SIDE CUTTING PLIER

Side cutting edge is designed for radio and telephone work. Has serrated jaws and a 19 and 22 gauge stripper notch. Red cushion handles.

Catalog No.	E.D.P. No.	Wt. Ea.
B-5615	75615-00	.250 lb.

NOTE: FOR WARRANTY SEE PAGE 95.

# TELEPHONE AND ELECTRICAL TOOLS

## WIRE WRAPPING TOOL

Hand operated tool suitable for either production line or field work. Makes 9 1/2 revolutions per stroke of trigger. RW-300 turns C-Clockwise for unwrapping.

Catalog No.	E.D.P. No.	Wt. Ea.
RW-100	18821	.718 lb.
RW-300	79831	.813 lb.

## WIRE WRAPPING TOOL

RW-200 has a collet chuck for quick change of bits.

Catalog No.	E.D.P. No.	Wt. Ea.
RW-200	18822	.718 lb.

## BITS & SLEEVES

Different sleeves are required depending on the size of the wire and the terminal. See tables below for selection of proper sleeve size.

### RW-100

Catalog No.	E.D.P. No.	Wire Ga.	Wt. Ea.
RS-264	19164	26	.031 lb.
RS-244	19144	24	.031 lb.

## UNWRAPPING TOOLS

This tool will rapidly remove within its range any solderless-wrapped connection.

Catalog No.	E.D.P. No.	Wire Ga.	Dirac.	Wt. Ea.
URW-2	18832	22&24	C-Clock.	.015
URW-3	18833	22&24	Clock.	.015
CT-3328	18834	22,24,26	C-Clock.	.094

## HEATED UNWRAPPING TOOL

For removing soldered wrapped connections made with 22, 24 and 26 gauge wire.

Catalog No.	E.D.P. No.	Wt. Ea.
CT-16450	18840	1.875 lb.

### TOOL TIP:

Do not hit one hammer with another.

### TOOL TIP:

Avoid excessive heat on pliers and all other tools.

NOTE: FOR WARRANTY SEE PAGE 95.

Catalog No.	E.D.P. No.	Wire Ga.	Wt. Ea.
RB-261	19061	26	.031 lb.
RB-241	19041	24	.031 lb.
RB-221	19021	22	.031 lb.
CT-16734	19031	22&24	.031 lb.

### TOOL TIP:

Do not use a "cheater" or pipe for extra leverage.

### TOOL TIP:

Universal Sockets are real time savers but do not hold a spinning impact universal in your hand.

### TOOL TIP:

An adjustable wrench must be properly tightened and fully seated. Also avoid using too small a wrench.

### TOOL TIP:

Do not use punches and chisels with mushroomed heads. And to prevent scraped knuckles use a punch and chisel holder.

### TOOL TIP:

Do not abuse adapters. The top ratchet could damage the fastener while the bottom ratchet loses a lot of turning power.

# PNEUMATIC POWER CUTTERS

## DIAGONAL PNEUMATIC POWER CUTTER

Tool operates at 40 psi to 90 psi air pressure, has an external adjusting screw for control of jaw opening, and may be used on many various applications simply by interchanging the variety of cutter heads listed below. May be used either right or left handed simply by rotating head 180°

Catalog No.	E.D.P. No.	Wt. Ea.
UA-200	18920	.813 lb.

## PNEUMATIC CUTTER HEAD

The jaws are machine ground from high speed steel with bevel edge geometry designed to cut .010 x .022 nickel ribbon and up to 1/8 diameter copper wire.

### SEMI FLUSH

Catalog No.	E.D.P. No.	Wt. Ea.
C-5A	74009	.157 lb.

## PNEUMATIC CUTTER HEAD

Precision beveled edges plus the mechanical advantage gained by use of the power unit are ideal for all around trimming of printed circuit boards and other production line cutting applications where speed is a necessity. Cuts soft drawn wire (T.S. 90,000 psi) up to .101" dia. at heel and .062" dia. at tip.

### REGULAR EDGE

Catalog No.	E.D.P. No.	Wt. Ea.
B-5	74005	.157 lb.

## PNEUMATIC CUTTER HEAD

Precision honed flush-edge is ideal for trimming printed circuit boards and other electronic sub-assemblies such as radio and TV chassis assembly. Cuts soft drawn wire (TS 90,000 psi) up to .062" dia.

### FLUSH EDGE

Catalog No.	E.D.P. No.	Wt. Ea.
B-6	74006	.157 lb.

## PNEUMATIC CUTTER HEAD

Precision cut and crimp type jaws for cutting and crimping component leads on printed circuit boards. To eliminate components from falling off prior to the wave solder operation. Cuts and crimps soft drawn wires (TS 90,000 psi) up to .040" dia.

Catalog No.	E.D.P. No.	Wt. Ea.
B-7	74007	.157 lb.

## LIGHT DUTY PNEUMATIC POWER CUTTER

Tool operates at 40 psi to 90 psi depending on wire gauge. 8 ft. hose and 1/8" pipe fittings furnished.

75271 diagonal cutting head shown is standard. Cutter has semi-flush edges and is recommended for cutting .017" to .040" dia. soft drawn wire (T.S. 90,000 psi).

Catalog No.	E.D.P. No.		Wt. Ea.
UA-100	18910	unit with jaws	.390 lb.
75271	75271	jaws only	.125 lb.

## TOOL TIP:

All wrenches should be flush and fully seated when used.

## TOOL TIP:

Use the correct hammer for each job. A body and fender hammer should never be used to strike punches and chisels.

## TOOL TIP:

Avoid excessive heat on pliers and all other tools.

## TOOL TIP:

Do not hit one hammer with another.

## TOOL TIP:

All electrical equipment should be properly grounded.

## TOOL TIP:

Torque wrenches are precision instruments, they are not to be used as a conventional wrench.

## TOOL TIP:

Keep electrical cords dry and replace frayed and broken wiring.

## TOOL TIP:

Use Phillips head screwdrivers for Phillips head screws.

### BLACK OXIDE FINISH

Bonney Loc-Rite Aerospace tool dimensions are in accordance with SAE-Standard AS 954 for Aerospace Engine use.

Bonney Loc-Rite standard aerospace tools are designed and dimensioned to replace the majority of the thin wall special tools now currently required.

However, for particular applications, because of size or shape requiring a special tool not covered by the standard Bonney Loc-Rite aerospace tools, please ask your local Utica distributor for quotation.

Bonney Crowfoot Wrenches are indispensable for tightening fittings to specified torque requirements. This slotted box type wrench is broached with the non-distorting Loc-Rite configuration and has many applications on aircraft fittings as well as other tubing installations. Excellent as attachment for torque wrenches. Forged from special alloy steel, heat-treated and tempered for strength and long life. Nickel chrome plated.

Bonney Crowfoot Wrenches are indispensable for tightening fittings to specified torque requirements. This slotted box type wrench is broached with the non-distorting Loc-Rite configuration and has many applications on aircraft fittings as well as other tubing installations. Excellent as attachment for torque wrenches. Forged from special alloy steel, heat-treated and tempered for strength and long life. Nickel chrome plated.

### TOOL TIP:

Do not use a "cheater" or pipe for extra leverage.

### TOOL TIP:

Universal Sockets are real time savers but do not hold a spinning impact universal in your hand.

### TOOL TIP:

An adjustable wrench must be properly tightened and fully seated. Also avoid using too small a wrench.

### TOOL TIP:

Do not use punches and chisels with mushroomed heads. And to prevent scraped knuckles use a punch and chisel holder.

# 1/2" SQ. DR. HANDLES AND ATTACHMENTS

Bonney 1/2" square drive sockets, handles, and attachments are lighter, stronger and more efficient to use. A complete range of size openings, with positive lock "ball check" feature is available with matched handles and attachments for every purpose. Made from carefully selected, fine alloy steel precision machined, scientifically hardened and tempered for long, dependable service.

Bonney Crowfoot Wrenches are indispensable for tightening fittings to specified torque requirements. This slotted box type wrench is broached with the non-distorting Loc-Rite configuration and has many applications on aircraft fittings as well as other tubing installations. Excellent as attachments for torque wrenches. Forged from special alloy steel, heat-treated and tempered for strength and long life. Nickel chrome plated.

### TOOL TIP:

Do not abuse adapters. The top ratchet could damage the fastener while the bottom ratchet loses a lot of turning power.

### TOOL TIP:

Use Phillips head screwdrivers for Phillips head screws. In this case both screwdriver and screw will suffer.

### TOOL TIP:

Do not use pliers as wrenches, rounded corners will result.

### TOOL TIP:

It is safer and easier to use one correct length extension instead of many.

### TOOL TIP:

Only impact sockets and extensions should be used on impact wrenches.

### TOOL TIP:

All wrenches should be flush and fully seated when used.

### \*Torque Lever Arm Dimension

Bonney Crowfoot Wrenches are indispensable for tightening fittings to specified torque requirements. This slotted box type wrench is broached with the non-distorting Loc-Rite configuration and has many applications on aircraft fittings as well as other tubing installations. Excellent as attachments for torque wrenches. Forged from special alloy steel, heat-treated and tempered for strength and long life. Nickel chrome plated.

### TOOL TIP:

Do not use a "cheater" or pipe for extra leverage.

### TOOL TIP:

Universal Sockets are real time savers but do not hold a spinning impact universal in your hand.

### TOOL TIP:

An adjustable wrench must be properly tightened and fully seated. Also avoid using too small a wrench.

# 3/4" SQ. DR. SOCKETS AND ATTACHMENTS

Bonney 3/4" square drive heavy-duty sockets, handles and attachments are the accepted standard of the discriminating mechanic. Beginning with finest alloy steel and finishing with durable chrome plate, Bonney 3/4" square drive tools more than meet every heavy-duty service need.

# COMBINATION WRENCHES

## BONNEY COMBINATION WRENCHES

Bonney Hex-Fit Combination Wrench series represents the ultimate in wrench design. Short and long styles have 6 point or 12 lobe box end openings and the "hex shape" in the open end. The slim design assures maximum working clearances along with precise fit on nuts, bolts or fasteners. Forged from special alloy steel, accurately machined, hardened and tempered for maximum strength and rugged service. These wrenches are available in either a full polish or satin beam finish and nickel chrome plated.

### TOOL TIP:

Universal Sockets are real time savers but do not hold a spinning impact universal in your hand.

### TOOL TIP:

An adjustable wrench must be properly tightened and fully seated. Also avoid using too small a wrench.

### TOOL TIP:

Do not use punches and chisels with mushroomed heads. And to prevent scraped knuckles use a punch and chisel holder.

### TOOL TIP:

All electrical equipment should be properly grounded.

### BONNEY OPEN END WRENCHES

Bonney Open End Wrenches are streamlined in every respect to provide the lightest, strongest wrench possible. Forged from a special alloy steel the openings are accurately machined in a "hex shape" for a solid fit and to apply pressure on four sides of hex fasteners. Each wrench is uniformly hardened and tempered for long dependable service. These wrenches are available in either full polish or satin beam finish, and nickel chrome plated.

## FLARE NUT WRENCHES

Especially designed with chambered openings and high head to beam clearance for maximum utility on fuel, oil and hydraulic line fittings. These wrenches are accurately broached with the Loc-Rite configuration and meet the non-distorting high torque requirements of Federal Specification GGG-W-00645. These are forged from a special alloy steel uniformly hardened and tempered, and nickel chrome plated.

PF-54TN	90262-07	1 3/8

## SOFT BRONZE HAMMER

For driving easily damaged parts, head is made of soft bronze, polished and lacquered. Handle wood grain fiberglass. Length 12".

Catalog No.	E.D.P. No.	Wt. Lbs.
PH-32	90232	2.00

## RUBBER TIRE MALLET

Head molded of special tough resilient rubber. Also popular for body work as soft face bumping hammer. Head diameter 3" Head length 4" OAL 16".

Catalog No.	E.D.P. No.	Wt. Lbs.
PH-30	90230	1.88

## 2 WAY HAMMER

A dual use hammer having one head of tough drop forged steel, the other a replaceable molded resilient rubber. Extremely popular because of its tremendous striking power. Length 16".

Catalog No.	E.D.P. No.	Wt. Lbs.
PH-34	90234	2.38

## HAMMER HANDLES

Part No.	E.D.P. No.	Head Size
PF-4H	90251-02	4 oz.
PF-8H	90252-02	8 oz.
PF-12H	90253-00	12 oz.
PF-16H	90254-02	16 oz.
PF-24H	90255-02	24 oz.
PF-32H	90256-02	32 oz.
PF-40H	90258-02	40 oz.

# PUNCHES/CHISELS AND PRY BARS

Bonney punches and chisels are forged from the finest alloy tool steel bars carefully heat treated. Differential tempering produces a softer striking end, and tougher workign tip. Nickel-chrome plated finished.

## ROLLING HEAD PINCH BAR

Expertly forged and heat treated for uniform hardness. Specially designed for close quarter work with tapered end for aligning work. Finished in nickel chrome plate—head and end polished.

Catalog No.	E.D.P. No.	Cut	Stock Dia.	O.A. Length	Wt. Lbs.
C39	90604	—	5/16	15	.98

## TOOL TIP:

Do not hit one hammer with another.

## TOOL TIP:

Avoid excessive heat on pliers and all other tools.

## TOOL TIP:

Regular wrenches are not made to be struck with hammers.

# PULLERS

These Bonney Pullers are designed with grooved push pins that slip *into the link assembly and lock in position by a single spring steel* retainer plate that is *pivoted to one link side members*. Jaws are adjusted or reversed in seconds. Buttress threads for longer wear. All parts are interchangeable.

## "QUICK-LOCK" LINK PULLER

Catalog No.	E.D.P. No.	Spread	Reach	Jaw Description	Wt. Lbs.
*P832	91332	4	3½	Straight, 2 Pos. Adj.	.88

\* Does not have buttress threads.

## "QUICK-LOCK" LINK PULLER

Catalog No.	E.D.P. No.	Spread	Reach	Jaw Description	Wt. Lbs.
P830	91330	6	3½	Rev., 1 wd., 1 nar.	1.88

## "QUICK-LOCK" LINK PULLER

Catalog No.	E.D.P. No.	Spread	Reach	Jaw Description	Wt. Lbs.
P831	91331	8	5½	Rev., 1 pin., 1 slot.	3.69

## "QUICK-LOCK" LINK PULLER

Catalog No.	E.D.P. No.	Spread	Reach	Jaw Description	Wt. Lbs.
P833	91333	10	9	Straight, 3 Pos. Adj.	4.44

## BATTERY TERMINAL PULLER AND GENERATOR BEARING PULLER

Designed to remove the tightest terminals without damage to the battery case or post. The swivel is designed so that it can be used also as a generator bearing and magneto gear puller. Range ¾" to 1 ¾".

Catalog No.	E.D.P. No.	Wt. Lbs.
P335	91329	.563

## HARMONIC BALANCER PULLER

Designed to pull balancers, vibration dampers, pulleys, or any gear with tapped holes. The four slots in the yoke allow the use of this tool in either two or three hole applications. The floating swivel prevents damage to shaft ends. Included are the necessary side screws—(3) ⅜-24, (3) ⅜-18, (2) ⅜-16.

Catalog No.	E.D.P. No.	Wt. Lbs.
P331	91363	2.500

## TIMING GEAR PULLER

Designed to remove timing gears, pulleys and other units with tapped holes. 6½" slotted cross-arm for variable center to center distances. Dual threaded side screws, ⅜-16 and ⅜-18 x 6½" long. Nickel chrome finish.

Catalog No.	E.D.P. No.	Wt. Lbs.
P861	91361	2.50

# PULLERS

## ECENTRIC STUD PULLER

Pinned eccentric is reversible for additional life. ½" square drive.

Catalog No.	E.D.P. No.	Wt. Lbs.
2591A	91320	1.131

## FLANGE TYPE AXLE PULLER

The four slots in the adapter allow this tool to be used on either 4, 5, or 6 bolt or stud designs. Has extra heavy 5¼ pound sliding hammer.

Catalog No.	E.D.P. No.	Wt. Lbs.
P337	91377	10.00

## UNIVERSAL WHEEL HUB PULLER

Sliding puller arms quickly and easily adjust to fit any type hub. Because of unique arm suspension a straight pull is made on all size bolt circles up to and including 7½" in diameter.

## PULLER SET

Catalog No.	E.D.P. No.	Wt. Lbs.
P325CH	91326	11.46
P325H	91325	Puller only

## TWO ARM GEAR PULLER

Maximum reach 2¾", spread 3½".

Catalog No.	E.D.P. No.	Wt. Lbs.
P305	91305	1.625

## PITMAN ARM PULLER

The forged alloy yoke and heavy-duty forcing screw for the most severe requirements.

Catalog No.	E.D.P. No.	Wt. Lbs.
P 329	91309	1.25

## CONVERTIBLE THREE JAW PULLER

Designed for quick changeover to a two or three jaw puller. The reversible jaws have a maximum reach of 3¾" in depth and up to 5½" spread.

Catalog No.	E.D.P. No.	Wt. Lbs.
PO11	91311	2.562
PO11L	91310	Long Jaws

## CONVERTIBLE THREE JAW PULLER (HEAVY DUTY)

Slotted reversible jaws have a maximum reach of 5½" and will spread to 8".

Catalog No.	E.D.P. No.	Wt. Lbs.
PO12	91312	6.000

## HEAVY DUTY THREE JAW CONVERTIBLE PULLER (LONG JAWS) (Not Illustrated)

The same as PO12 except jaws have a maximum reach of 8½" depth and spread to 10 inches.

Catalog No.	E.D.P. No.	Wt. Lbs.
PO12L	91313	7.000

## SHOCK LINK AND STABILIZER LINK SEPARATOR

This forked wedge separator is used to free the tapered links of the shock absorber assembly or the stabilizer assembly from their mountings. Jaw opening: ¾". Length: 16".

Catalog No.	E.D.P. No.	Wt. Lbs.
P317	91317	2.250

## PITMAN ARM SEPARATOR

Jaw opening: 1½", Length: 11¼".

Catalog No.	E.D.P. No.	Wt. Lbs.
P319	91319	1.625

NOTE: FOR WARRANTY SEE PAGE 95.

# PULLERS

## STEERING WHEEL PULLER

Designed to pull steering wheels on most late model automobiles. Includes three sets of side screws,  $\frac{3}{8}$ "-16,  $\frac{3}{8}$ "-18, and  $\frac{3}{8}$ "-24. The floating swivel is recessed so as not to damage the spring tip connected to the horn wires. Slotted cross-arm, 4" long. Bright Cadmium plated.

Catalog No.	E.D.P. No.	Wt. Lbs.
P311	91335	2.250

## BEARING SPLITTER

Designed for removing generator parts, bearings, bearing cones and other similar parts where most puller jaws will not reach. The flush, knife edge opening will get behind work close to a housing, or close together parts requiring wedging apart. Designed for use with Bonney jaw pullers or cross-arm pullers.

Catalog No.	E.D.P. No.	Capacity	Wt. Lbs.
P333	91372	2 1/4" O.D.	1.38

## LARGE BEARING SPLITTER

Catalog No.	E.D.P. No.	Capacity	Wt. Lbs.
P334	91373	4 1/4" O.D.	6.50

## PILOT BEARING PULLER

2 jaw puller for internal pulling. Pulls in and through blind holes. Removes flywheel pilot and other blind recessed bearings. Capacity is  $\frac{1}{2}$ " to 1 1/2" I.D. shaft is 14" long and interchangeable with shaft of 866 puller.

Catalog No.	E.D.P. No.	Wt. Lbs.
P867	91367	5.06

## TWO-JAW PULLER

A general Automotive external gear puller

1-P866B, 2-P866J, 1-P866N, 1-P868S, 1-P868T.

Catalog No.	E.D.P. No.	Wt. Lbs.
P858	91358	1.91

## SHAFT HAMMER PULLER

Has reversible jaws for either internal or external pulling. jaws are adjustable for external pulling up to 5" O.D., and for internal pulling from 1 1/4" to 6" I.D. All alloy steel construction chrome plated. Shaft is 24" long.

Catalog No.	E.D.P. No.	Wt. Lbs.
P866X	91380	7.06

# BRAKE SERVICE

## DEGLAZING BRAKE CYLINDER HONE

RC-150

RC-160

Catalog No.	E.D.P. No.	Wt. Lbs.
RC150	92230	.221

Fully adjustable spring tension for all cylinders 2" to 5 1/4" diameter. Furnished with 3" long medium grit stones. Drive stud diameter 2.60".

Catalog No.	E.D.P. No.	Wt. Lbs.
RC160	92240	1

Furnished with 4" long, medium grit stones. For cylinder diameter 2" to 7 1/2". Drive stud diameter 2.60".

Catalog No.	E.D.P. No.	Wt. Lbs.
RC170	92220	1.089

## REPLACEMENT STONES SETS

Catalog No.	E.D.P. No.	Stone Length	Type Grit
RC151	92235	1 1/8	M.
RC152	92236	1 1/8	F.
RC161	92216	3	M.
RC162	92215	3	F.
RC171	92223	4	M.
RC172	92226	4	F.

Neither stones, nor flexible drive is replaceable for damage of any kind.

F.—Fine—400 grit.

M.—Medium—280 grit.

## STAR NUT ADJUSTING SPOON

Notched design for clearance on G.M. compacts. Services standard Bendix brakes also. 9 3/8" long.

Catalog No.	E.D.P. No.	Wt. Lbs.
2568	92150	.313

## STANDARD ADJUSTING SPOON

For most brakes, except Chevrolet. 7 1/2" long.

Catalog No.	E.D.P. No.	Wt. Lbs.
2567	92151	.213

## BENDIX BRAKE ADJUSTER

Catalog No.	E.D.P. No.	Wt. Lbs.
2566	92152	.300

## CHEVROLET ADJUSTING SPOON

Catalog No.	E.D.P. No.	Wt. Lbs.
2566A	92153	.144

## THREE-WAY BRAKE SPRING TOOL

One end removes Bendix brake shoe springs. Second end replaces springs. Third end is anti-rattle spring tool with slotted tip.

Catalog No.	E.D.P. No.	Wt. Lbs.
2570	29964	.63

## BRAKE SPRING REMOVAL AND REPLACEMENT TOOL

With Bendix type remover socket.

Catalog No.	E.D.P. No.	Wt. Lbs.
2574	92161	.4

## BRAKE BLEEDER WRENCH

3/8" and 1/4" vented sockets permits brake bleeding without removing wrench.

Catalog No.	E.D.P. No.	Wt. Lbs.
2571	29970	.25

NOTE: FOR WARRANTY SEE PAGE 95.

## RAMBLER BRAKE BLEEDER WRENCH

1/4" hex opening fits most compacts. 5" long.

Catalog No.	E.D.P. No.	Wt. Lbs.
2569	24921	.063

## BRAKE SHOE RETAINER TOOL

Installs and removes coil and hairpin type.

Catalog No.	E.D.P. No.	Wt. Lbs.
2575	92165	.187

## DOUBLE FLARING TOOL SET

Designed to produce 45° double flares on 3/16", 1/4", 5/16", 3/8" and 1/2" O.D. soft steel tubing up to .040 wall thickness.

Catalog No.	E.D.P. No.	Wt. Lbs.
RF100B	84905	3.250

## TUBE CUTTER

Designed to cut tubing from 1/8" to 1" O.D.

Catalog No.	E.D.P. No.	Wt. Lbs.
RF59A	92066	.588

## FLARING TOOL

Capacity 3/8" to 1 1/2". 3/8" wide, 6 1/2" long.

Catalog No.	E.D.P. No.	Wt. Lbs.
RF46	92046	2.038

# ENGINE SERVICE

## "C" CLAMP UNIVERSAL TYPE VALVE LIFTER

Designed to fit springs 1" through 2½" diameter. For L-head and O.H.V. Engines. Height: 10½", Width: 9½".

Catalog No.	E.D.P. No.	Wt. Lbs.
RC110	91910	7.00

## PISTON RING COMPRESSOR

Capacity 1½" to 3" diameter. Width 2". Friction brake single band.

Catalog No.	E.D.P. No.	Wt. Lbs.
RC41	92341	.310

## RING COMPRESSOR

Capacity 2½"-5". Width 3½", Ratchet Brake, Double band.

Catalog No.	E.D.P. No.	Wt. Lbs.
RC43A	92343	.75

## TRUCK RING COMPRESSOR

Capacity 3½"-7", Width 3½", Ratchet Brake, Double band.

Catalog No.	E.D.P. No.	Wt. Ea.
RC44A	92344	.82 lbs.

## TRUCK RING COMPRESSOR

Capacity 3½"-7", Width 6½", Ratchet Brake, 4 Bands.

Catalog No.	E.D.P. No.	Wt. Ea.
RC45A	92345	1.64 lbs.

## UPPER MAIN BEARING SEAL TOOL

17 Piece set removes and installs seal without dropping crankshaft. This set includes such small tools and accessories as are necessary to seal removal and replacement.

Catalog No.	E.D.P. No.	Wt. Lbs.
610	92313	.48

## PISTON RING GROOVE CLEANERS

For piston diameters 2 thru 5".  
Four blade cutter cleans grooves ⅜"-⅝"-⅝". Length 11⅞".

RC46 CLEANS GROOVES ⅜" — ⅝" — ⅝" — ⅝"

RC47 CLEANS GROOVES ⅝" — ⅝" — ⅝" — ⅝"

Catalog No.	E.D.P. No.	Wt. Lbs.
RC46	92303	.52
RC47	92304	.52

# GENERAL SERVICE

## DELUXE HACKSAW FRAME

Extra blade storage in tube. Pistol-grip handle, chrome and enamel frame. Uses 12" blade only.

Catalog No.	E.D.P. No.	Wt. Lbs.
2623	91423	1.50

## ALL STEEL HACKSAW FRAME

Heavy cold rolled steel frame with full formed, nonbreakable pistol grip handle. Adjustable from 8-12". Length. 16".

Catalog No.	E.D.P. No.	Wt. Lbs.
2628	91428	1.375

## MIDGET (CLOSE QUARTER) HACKSAW FRAME

Designed to fit in confined areas. Handles only 6" blades.

Catalog No.	E.D.P. No.	Wt. Lbs.
2630	91406	.296 lbs.
2630B	91493	Replacement Blades, pkg. of 10

## THREAD RESTORER FILES

## WOOD HANDLES

Bonney hardwood file handles are provided in the three popular sizes to cover the full range of file lengths.

Catalog No.	E.D.P. No.	Description	Wt. Lbs.
FH2	91592	Small for 5" and 6" files	.125
FH3	91593	Medium for 8" and 10" files	.125
FH4	91594	Large for 12" and 16" files	.187

NOTE: FOR WARRANTY SEE PAGE 95.

# FEELER GAUGES

## COMBINATION GAUGE FUEL MARKING Inches/mm

Contains ten 3" x 1/2" blades on one end of the following thicknesses: .002 thru .015; and twelve 1 3/4" x 1/4" blades on the other end of the following thicknesses: .011 thru .020/.5080.

Catalog No.	E.D.P. No.	Wt. Lbs.
K51	91251	.750

## IGNITION GAUGE

Contains twelve 1 3/4" x 1/4" blades of the following thicknesses: .011 thru .022/.5588.

Catalog No.	E.D.P. No.	Wt. Lbs.
K52	91252	.373

## UNIVERSAL MASTER GAUGE

Contains twenty-five 3 3/8" x 1/2" blades of the following thicknesses: .0015 thru .035.

Catalog No.	E.D.P. No.	Wt. Lbs.
K53	91253	.1250

## STANDARD FEELER GAUGE

Contains ten 3 3/8" x 1/2" blades of the following thicknesses: .022 through .015.

Catalog No.	E.D.P. No.	Wt. Lbs.
K54	91254	.500

## SPARK PLUG GAUGE

High energy round wire, spark plug gauge six wire sizes in thousandths and metric equivalents. .035, .040, .054, .060, .080, plus electrode adjusting tool.

Catalog No.	E.D.P. No.	Wt. Lbs.
K67	91270	.063

## SPARK PLUG WIRE GAUGE

Contains one electrode bender and eight wire gauges of the following thicknesses: .022 thru .035.

Catalog No.	E.D.P. No.	Wt. Lbs.
K57	91257	.468

## MASTER IGNITION GAUGE

Services domestic and foreign cars. Contains sixteen 1 3/4" x 1/4" blades of the following thicknesses: .011 thru .028.

Catalog No.	E.D.P. No.	Wt. Lbs.
K63	91263	.373

## CARBURETOR AND DISTRIBUTOR ADJUSTING SET

Catalog No.	E.D.P. No.	Wt. Lbs.
2125	92306	.642

### HANDLE

$\frac{1}{4}$ " square drive with adjustable locking handle. 16" length.

Catalog No.	E.D.P. No.	Wt. Lbs.
2126	92307	.500

### SOCKET

Self-locating idle air screwdriver socket.

Catalog No.	E.D.P. No.	Wt. Lbs.
2127	92308	.032

### SCREWDRIVER

Holley idle adjustment screwdriver, self-locating.

Catalog No.	E.D.P. No.	Wt. Lbs.
2128	92309	.063

### DELCO HEX BIT

For setting points in Delco distributors.

Catalog No.	E.D.P. No.	Wt. Lbs.
2129	92310	.047

## UNIVERSAL OIL FILTER REMOVING AND REPLACING TOOL

Cam acting. Eliminates clearance problems.  $\frac{3}{8}$ " square drive.

Catalog No.	E.D.P. No.	Wt. Lbs.
600	92301	.375

## NEON TUBE SPARK TESTER

Catalog No.	E.D.P. No.	Wt. Lbs.
E06	92302	.160

## HEX KEY WRENCH SETS

Precision manufactured for accurate fit on Hex Socket Head Screws—Regular and Long Style.

### 15 PIECE SET REGULAR

Regular sizes .028 thru  $\frac{3}{16}$ ".  
Wt.: .625 lbs. Packaged in red vinyl pouch.  
This set fits all screws of the new 1960 series.  
Socket screws and set screws in sizes No. 0 thru  $\frac{3}{16}$ ".

Catalog No.	E.D.P. No.	Wt. Lbs.
N6R	82006	.625

### 8 PIECE SET LONG

Long,  $\frac{3}{4}$ " thru  $\frac{1}{2}$ ".  
Wt.: .562 lbs. Packaged in red vinyl pouch.

Catalog No.	E.D.P. No.	Wt. Lbs.
N7R	82007	.562

## BATTERY TERMINAL BRUSH

Internal and external wire brushes, clean battery post and cable terminal surfaces.

Catalog No.	E.D.P. No.	Wt. Lbs.
IG300	92100	.250

## CARBON SCRAPER

Catalog No.	E.D.P. No.	Wt. Lbs.
198	91648	.27

## PUTTY KNIFE AND SCRAPER

### FLEX-BLADE

Catalog No.	E.D.P. No.	Wt. Lbs.
197	91641	.16

### STIFF BLADE

Catalog No.	E.D.P. No.	Wt. Lbs.
196	91647	.19

## RESTORER TAP SETS

Cat. No.	E.D.P. No.	Description	Wt. Lbs.
803B	84403	Set of 6 N.F. taps	.88
804B	84404	Set of 6 N.C. taps	.88

Set No. 804B (NC) consists of:  $\frac{1}{4}$ -20,  $\frac{1}{8}$ -18,  $\frac{3}{16}$ -16,  $\frac{7}{16}$ -14,  $\frac{1}{2}$ -13,  $\frac{5}{8}$ -12.

## FLEXIBLE MAGNETIC PICK-UP TOOL

Catalog No.	E.D.P. No.	Wt. Lbs.
K18	91815	.22

# AIR AND REFRIGERATION SETS

## TOOL TIP:

Do not abuse adapters. The top ratchet could damage the fastener while the bottom ratchet loses a lot of turning power.

## TOOL TIP:

Use Phillips head screwdrivers for Phillips head screws.

## TOOL TIP:

Do not use pliers as wrenches, rounded corners will result.

Set No. RF80B E.D.P. No. 83080

### 20 PIECE BASIC REFRIGERATOR SET

Includes the most popular refrigeration sockets and attachments.

## DOUBLE FLARING TOOL SET

Designed to produce 45° flares on  $\frac{3}{16}$ ",  $\frac{1}{4}$ ",  $\frac{5}{16}$ ",  $\frac{3}{8}$ ", and  $\frac{1}{2}$ " O.D. soft steel tubing up to .040 wall thickness. Also, designed to form single flare on soft copper, aluminum, or brass tubing. Forcing cone has swivel action design to reduce friction. Forged steel yoke hardened and tempered for greater strength. Packaged in fitted, metal case. Bright plated finish.

Catalog No.	E.D.P. No.	Wt. Ea.
RF-100B	84905	3.250 lbs.

## FLARING TOOL

Capacity:  $\frac{3}{16}$ " to  $\frac{1}{2}$ ".  
Made of high grade steel carefully machined and heat treated for long, dependable service.  
 $\frac{3}{8}$ " wide, 6  $\frac{1}{2}$ " long.

Catalog No.	E.D.P. No.	Wt. Ea.
RF-46	92046	2.038 lbs.

## TUBE CUTTER

Designed to cut tubing from  $\frac{1}{8}$ " to 1" O.D. Reamer held securely out of the way when not in use. Finish: Nickel chrome plate.  
Width: 2". Length: 5".

Catalog No.	E.D.P. No.	Wt. Ea.
RF-59A	92066	.588 lbs.

## MIDGET HACKSAW FRAME

Designed to work in close places. Ideal for refrigeration servicemen and plumbers. Lgth.: 10".

## MIDGET HACKSAW FRAME (Cont.)

Catalog No.	E.D.P. No.	Wt. Ea.
2630	91406	.296 lbs.

## BLADES FOR NO. 2630 FRAME (not illustrated)

Lgth.: 6". Package of 10.

Catalog No.	E.D.P. No.	Wt. Ea.
2630B	91493	.065

## FORK WEDGED SEPARATOR

Designed to remove pulleys in tight places.  
Length 11  $\frac{1}{4}$ ".

Catalog No.	E.D.P. No.	Wt. Ea.
P-319	91319	1.625 lbs.

## REVERSIBLE RATCHET

Designed for work in limited space and where obstructions prevent the use of socket and ratchet handles. The efficient, smooth, working ratchet action provides the necessary speed with minimum handle movement. Outside plates are chrome plated for attractive appearance and extremely long service.

Catalog No.	E.D.P. No.	Handle 4 Pt.	Openings 6 Pt.	O.A. Length	Wt. Lbs.
RF-45A	24445	$\frac{3}{16}$ - $\frac{1}{4}$	$\frac{1}{2}$	6	.281

RF-41	92041	$\frac{1}{4}$	$\frac{5}{8}$	.047
RF-49	92049	$\frac{1}{4}$	$\frac{1}{4}$	.031

# TORQUE PRODUCT HIGHLIGHTS

## BEAM TYPE TORQUE INDICATING WRENCHES

Parallax correcting mirror permits the operator to read the scale correctly from practically all positions. When reading the dial at an angle, the true torque reading is halfway between pointer and pointer reflection indications.

Pivoted handle transmits the load to the deflecting element in ONE precise spot for which the wrench was calibrated. A MUST in a professional bending beam wrench.

Die-Cast dial base plate with an integral pointer guard for maximum tool life.

## DIAL INDICATING TORQUE WRENCHES

Slim drive end. Easier to work in tight places.

Sturdy integral indicator guards prevent breakage of the crystal.

One-piece injection molded crystal and bezel—stronger, more durable and trouble-free than the common two, three or more piece construction.

Use with handle extensions, apply load anywhere. Unique construction assures same accuracy regardless of point of load application.

Parallax—correcting mirror on dial face for correct readout from any position. When reading the dial at an angle, the true torque reading is halfway between pointer and pointer reflection indications.

## MICROMETER (CLICK) TORQUE SENSING WRENCHES PLAIN, RATCHET AND FLEX HEAD

Patented torque control mechanism for right and left hand operation. Low-Friction design for consistent readings at either fast or slow torquing.

Two calibration adjustments for better accuracy. Most torque wrenches have only one adjustment. Utica's micrometer adjustable wrenches have a major and a fine adjustment for easier and better calibration.

Patented spring loaded locking mechanism assures that wrench will stay set at the desired reading. It locks automatically so it cannot be left unlocked accidentally.

## TORQUE LIMITING SCREWDRIVERS

Aluminum outside construction for lightweight and non-magnetic characteristics.

Precision micrometer scale (adjustable models).

Spring loaded lock collar automatically locks in the set reading (adjustable models).

Easy-release bit holder. Bits are held securely during operation and yet they practically fall out after being released. Eliminates bits stuck in the fastener or in the bit holder (patent applied for).

Anti-backlash.

U. S. Patent 3,119,247.

## TORQUE PRODUCTS LIMITED WARRANTY

Each torque product carrying the trademark UTICA® /BONNEY® is warranted, except as to calibration, by Utica Tool Co., Inc. for the normal life of the product to be free from any defect in material or workmanship. Each torque product carrying the trademark UTICA® /BONNEY® is warranted as to calibration by Utica Tool Co., Inc. for 90 days from the date of purchase to be free from any defect in material or workmanship.

Any product failing to conform with this warranty should be sent to Utica Tool Co., Inc., Cameron Road, Orangeburg, South Carolina 29115, Attention: Superintendent of Quality Control [or to the distributor of UTICA® /BONNEY® tools nearest you]. If inspection reveals that the product does not conform with this warranty, the product will be repaired or replaced, at the option of Utica Tool Co., Inc., without charge within 10 days of receipt of the product by Utica Tool Co., Inc.

This warranty does not extend to any product which has been altered or abused.

ALTERATION: grinding, filing, heating, welding or other modification.

ABUSE: improper or unreasonable use, as hand sockets used with an impact gun; use of "cheaters" producing excessive leverage; hammering upon non-striking face tools.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

# BEAM AND DIAL TYPE TORQUE WRENCHES

## DIAL TORQUE INDICATING WRENCHES

Dial indicating torque wrenches allow the operator to determine his applied torque on a round, crystal protected scale. As either right or left torque is applied, the amount is indicated on a precision, instrument type dial. This permits the operator to accurately control the torque throughout all stages of the fastening or measuring operation.

Accuracy is + 4% in either direction.

## BEAM TYPE TORQUE INDICATING WRENCH DUAL METRIC AND STANDARD SCALE

Round Beam Torque Wrenches are the most economical and reliable torque tools for general service applications. The torque is measured by the deflection of a precision measuring element, and is indicated to an accuracy of + 4% on a conveniently located dial — in both right and left hand direction.

# MICROMETER ADJUSTABLE (CLICK) TORQUE SENSING WRENCHES

## MICROMETER (CLICK) TORQUE SENSING WRENCHES PLAIN AND RATCHETING HEAD

PULL...CLICK! — it's torqued with micrometer accuracy. No dials to watch, no pointers to protect, no handles to keep in alignment. Fast, accurate and yet simple. This is the story behind Utica's TORQUE SENSING wrenches. Whether you choose a micrometer adjustable with plain or ratcheting drive, or an industrial preset interchangeable head model, you will be using the latest in torque wrench design.

Accuracy is  $\pm 4\%$  right hand (clockwise) and  $\pm 6\%$  left hand (counter-clockwise).

# INTERCHANGEABLE HEAD (CLICK) TYPE TORQUE WRENCHES

## INTERCHANGEABLE HEAD CLICK TORQUE SENSING WRENCHES "A" SIZE SERIES

Same action as square drive torque wrenches. Interchangeable head wrenches will take a variety of heads to suit the particular application or to allow for an easy exchange of worn-out heads. Common center principle allows the head to be replaced or exchanged without need for recalibration. Single setting wrenches do not have a scale and are set on a torque tester. When ordering single setting wrenches, please specify the torque setting. A and B heads are **not** interchangeable.

## MICROMETER ADJUSTABLE WRENCHES "A" SIZE SERIES

## INTERCHANGEABLE HEAD CLICK TORQUE SENSING WRENCHES "B" SIZE SERIES

"B" size series of interchangeable head wrenches and heads are designed for higher torque applications than the "A" series. "A" size heads will not fit "B" size wrenches and vice versa.

Should a head size or type be desired for either "A" or "B" series wrenches that are not listed here, it can be ordered as a special.

# TORQUE LIMITING SCREWDRIVERS & ACCESSORIES

## HEAVY DUTY AND LIGHT DUTY MODELS

### TORQUE LIMITING SCREWDRIVERS HEAVY—DUTY

Torque limiting screwdrivers offer the most reliable means of tightening small threaded fasteners. When the set torque is reached, the screwdriver goes into a freewheeling condition preventing further torquing of the fastener. The control mechanism engages and disengages 8 times during each revolution of the handle in either right or left hand direction.

#### ADJUSTABLE MODELS

Adjustable models have a calibrated micrometer scale. The patented spring loaded locking mechanism assures that the screwdriver will stay set at the desired reading.

Catalog No.	E.D.P. No.	Range	Increments	Hex Drive	Wt.
TS-100	28712	1 to 100 oz. in.	2 oz. in.	½ Female	8 Oz.
TS-30	28710	1 to 30 lb. in.	1 Lb. In.	¼ Female	8 Oz.
TS-35	28711	1 to 35 in. lb.	1 Lb. In.	¼ Female	8 Oz.

#### ADJUSTABLE MODELS

TS-10CM	28703	1-10CM-KG	.2CM-KG	¼ Female	8 Oz.
TS-30CM	28704	2.5-30CM-KG	.5CM-KG	¼ Female	8 Oz.

#### PRESET MODEL

Preset models are best suited for high volume assembly line work. Please specify torque setting desired when ordering preset tools.

TS-SN-2	28716	64-640	4-40	.5-4.5	5-45	¼ Female

### TORQUE LIMITING SCREWDRIVERS LIGHT DUTY

These light duty torque limiting screwdrivers offer the most reliable means of tightening the smallest of threaded fasteners. The largest model only weighs 1 oz. When the set torque is reached, the screwdriver goes into a freewheeling condition preventing further torquing of the fastener. The control mechanism engages and disengages 4 times during each revolution of the handle in either right or left hand direction.

# TORQUE MULTIPLIERS AND TORQUE TESTERS

## UNIVERSAL TORQUE MULTIPLIERS

Utica Universal Torque Multipliers, the Force Multipliers. They turn fasteners easily where working space is limited and unusually high force must be applied.

They are rugged, precision-made, geared wrenches. Built with needle roller bearings throughout. Utica multipliers are designed for accurate torquing of large fasteners as well as providing potent output of power for loosening tough nuts and bolts.

Manual input torque is multiplied through the gearing, and output torque applied to the fastener. Because minimum effort is required to operate a Utica Torque Multiplier, one man operation is feasible.

Rotation of the output drive is 360° continuous in either direction.

### 1/2" SQUARE DRIVE MULTIPLIER

Catalog No.	E.D.P. No.	Description
TMA-1000F	93171	Power Ratio: 6:1 Input Drive: 1/2" (12.7 mm) Sq. F. Rated Input Capacity: 169-ft-lbs (241 Nm, 24 M-KG) Output Drive: 3/4" (19.1 mm) Sq. M. Rated Output Capacity: 1000 ft-lbs (1400 Nm, 140 mkp) Net Weight Lbs: 14 Lbs (6.4 kg)

### 3/4" SQUARE DRIVE MULTIPLIER

Catalog No.	E.D.P. No.	Description
TMA-2000F	93172	Power Ratio: 6:1 Input Drive: 3/4" (19.1 mm) Sq. F. Rated Input Capacity: 333 ft-lbs (474 Nm, 47 M-KG) Output Drive: 1" (25.4 mm) Sq. M. Rated Output Capacity: 2000 ft-lbs (2700 Nm, 280 mkp) Net Weight Lbs: 17 Lbs (7.7 kg)

## TORQUE TESTER (PRECISION) TORSION BAR TYPE GT

1 oz. in. to 500 lb. ft. and 0 to 25 M-KG ranges.

1% accuracy.

Resolution comparable to highly priced electronic or optical torque testers.

"Turn 'Round" indicator (dial can be turned to face any direction around its axis).

Memory pointer with simple push-button release.

Durable and simple construction.

Special enclosed compartment for adapters and calibration papers.

Meets or exceeds military specifications MIL-T-26639 (Applicable sizes).

Certification traceable to the National Bureau of Standards provided with all units.

Will check both right and left hand torque devices.

## ENGLISH SCALES—TYPE GT

Catalog No.	E.D.P. No.	Range	Incre.	Output Shaft	Adapters
GT-600Z	93121	0 to 600 Oz. In.	1 Oz. In.	1/4 Hex. Male	1/4 Sq. Female
GT-250P	93122	0 to 250 Lb. In.	.5 Lb. In.	3/8 Sq. Male	1/4 Sq. Female
GT-1000P	93123	0 to 1000 Lb. In.	2 Lb. In.	1/2 Sq. Male	3/8 Sq. Female
GT-2000P	93124	0 to 2000 Lb. In.	.4 Lb. In.	1/2 Sq. Male	1/2 Sq. Female
GT-500F	93125	0 to 500 Lb. Ft.	1 Lb. Ft.	3/4 Sq. Male	1/2 Sq. Female

## METRIC SCALES—TYPE GT

Catalog No.	E.D.P. No.	Range	Incre.	Output Shaft	Adapters
GT-50 CM	93127	0-50 CM-KG	.1 CM-KG	1/4 Hex Male	1/4 Sq. Female
GT-250 CM	93128	0-250 CM-KG	.5 CM-KG	3/8 Sq. Male	1/4 Sq. Female
GT-1000 CM	93129	0-1000 CM-KG	.2 CM-KG	1/2 Sq. Male	3/8 Sq. Female
GT-25M	93130	0-25 M-KG	.05 M-KG	1/2 Sq. Male	1/2 Sq. Female

Note: The adapters are female to female socket type, one end fits the tester drive, the other is female square of the size listed.

# TORQUE TESTERS AND PRIMARY STANDARDS

## TORQUE TESTERS (ULTRA PRECISION) CANTILEVER BEAM TYPE ET

Will check both right and left hand torque devices.

1 oz. in. to 1000 lb.-ft. ranges.

± 1% or 1 graduation accuracy on Standard Models

± ½% Accuracy over 60% of the range on special order.

Easily positioned 360° Viewing Dial.

Will operate accurately when mounted in any position.

Maximum input torque is retained on the dial until reset to zero.

Will remain accurate after 50,000 cycles at 75% full load, with a breakaway (click) type torque wrench.

20% overload factor.

Portable and light weight.

Certification traceable to N.B.S. supplied with each tester.

Meets or exceeds military specification MT-T-26639.

## ENGLISH SCALES TYPE ET

Catalog No.	E.D.P. No.	Range	Incr.	Drives	Standard Adapters*
ET100Z	93101	0 to 100 Oz. In.	.1 Oz. In.	¼ Hexagon	¼, ¾
ET 500Z	93102	0 to 500 Oz. In.	.5 Oz. In.	¼ Hexagon	¼, ¾
ET 250P	93103	0 to 250 Lb. In.	.25 Lb. In.	½ Square	¼, ¾, 1"
ET 2000P	93104	0 to 2000 Lb. In.	2 Lb. In.	½ Square	¼, ¾, 1"

## DUAL RANGE MODELS

ET 600Z	93107	0 to 100 Oz. In.	.1 Oz. In.	¼ Hexagon	¼, ¾
		0 to 500 Oz. In.	.5 Oz. In.	¼ Hexagon	
ET 2250P	93108	0 to 250 Lb. In.	.25 Lb. In.	½ Square	¼, ¾, 1"
		0 to 2000 Lb. In.	2 Lb. In.		

Note: The adapters are female to female socket type—one end fits the tester drive, the other is female square of the size listed.

## PRIMARY TORQUE STANDARDS

Primary torque standards are used to calibrate torque testers and to conduct other precision torque measurements. They consist of a lever arm to which weights are attached to produce torque. Utica primary torque standards are of a radius design to avoid cosine errors, and when used in conjunction with class "C" weights (supplied with CTP-500Z) are guaranteed to be accurate to within ±.25%.

Weight sets for CTS-2000P and CTS-1000F are shown on next page and are certified to class "C" tolerance and traceable to N.B.S.

Catalog No.	E.D.P. No.	Calibration of Tester Models	Description
CTP-500Z	93181	ET 100Z ET 500Z ET 600Z GT 600Z GT 50CM	Calibration Range: 5 to 505 Oz. In. Drive: ¼" Female Hexagon Effective Radius: 2.835" Weights: All weights are included and are marked in effective torque.

Catalog No.	E.D.P. No.	Calibration of Tester Models	Description
CTS-2000P	93182	ET 250P ET 2000P ET 2250P GT 250P GT 1000P GT 2000P GT 250CM GT 1000CM	Calibration Range: 20 to 2000 Lb.-In. Drives: ¼", ¾" ½" Female Square Effective Radius: 10" 2 Lb. weight holder is included. (Weights not included.)

Catalog No.	E.D.P. No.	Calibration of Tester Models	Description
CTS-1000F	93183	ET 6000PF ET 1000F GT 500F GT 25M	Calibration Range: 200 to 12000 Lb.-In. Drives: ½", ¾" and 1" Female Square Effective Radius: 40" 5 Lb. weight holder is included. (Weights not included.)

# ACCESSORIES AND CUSTOM TORQUE WRENCHES

## MECHANICAL LOADING DEVICE

A mechanical loading device is used to provide power assist in testing or calibrating higher capacity torque wrenches. The device will accommodate all makes of torque wrenches up to 1000 lb-ft in capacity. Remote, push button controls make it easy to take precision torque readings from any convenient position around the torque tester.

Catalog No.	E.D.P. No.	Description
MLT-1200FE	93184	Capacity: 1000 Lb. Ft. Stroke: 6 inches Power: 110v, 60 cycles, 300 watts

## CAT. NO. WS1000F E.D.P. NO. 93186 9 PIECE TORQUE STANDARD WEIGHT SET

### SET CONSISTS OF:

Weight	E.D.P. No.	Quantity	Dia.	Thickness
5 lb.	93104-50	1	6"	3/16"
10 lb.	93104-51	1	9"	13/16"
20 lb.	93104-52	2	9"	1 1/2"
50 lb.	93104-53	5	11"	2 1/8"

This weight set is used with standard CTS 1000 F to calibrate testers. . . ET-6000 PF — ET-1000 F — GT-500F — GT-25M. Weight sets are packed in sturdy wooden boxes.

## CAT NO. WS-20000P E.D.P. NO. 93185 10 PIECE TORQUE STANDARD WEIGHT SET

### SET CONSISTS OF:

Weight	E.D.P. No.	Quantity	Dia.	Thickness
1/2 lb.	93104-47	1	2"	7/16"
1 lb.	93104-48	1	4"	7/16"
2 lb.	93104-49	1	6"	2 1/4"
5 lb.	93104-50	1	6"	1 3/8"
10 lb.	93104-51	1	9"	1 3/8"
20 lb.	93104-52	2	9"	1 1/2"
50 lb.	93104-53	3	11"	2 1/8"

This weight set is used with standards to calibrate testers. . . ET-250 P — ET-2000 P — ET-2250 P — GT-250 P — GT-1000 P — GT-2000 P — GT-250 CM and GT-1000 CM. Weight sets are packed in sturdy wooden boxes.

## CUSTOM BUILT - PRESET (CLICK) TORQUE SENSING WRENCHES

Due to a countless number of possible combinations of heads and handles, single setting, fixed head wrenches are not stocked and are only made to order. We encourage our customers to "design" their own wrenches by selecting one of the standard handles listed, and one of the heads shown on the previous pages. In requesting quotations, please specify handle size, head type and size, torque setting and quantities. In general, single setting fixed head wrenches are economical to order in large quantities only. For special applications, or for applications involving a limited tool clearance or access, our engineering department will design a proper head or a complete wrench. In requesting a quotation please specify the following:

- 1) Nut or bolt type and size. For special fasteners send in a drawing or, if possible, the part itself.
- 2) Description of the problem. If possible, send drawings or sketches showing clearances, obstructions, etc.
- 3) Special requirements (non-sparking, non-magnetic, weight or size limitations, etc.)
- 4) Torque setting. If unknown, we will attempt to determine it.
- 5) Quantities.

## STANDARD HANDLES AVAILABLE

Handle Size	Torque Range		Dimensions		Weight Less head (lbs)
			Length Inches	Diameter Inches	
A-5	5-100	.5-8	5	5/8	1/2
A-7	10-200	1-17	7	5/8	3/4
B-7	50-500	4-40	7	7/8	1
B-9	75-750	6-60	9	7/8	1 1/4
B-11	100-1000	8-80	11	7/8	1 1/2
B-13	150-1500	12-125	13	7/8	1 3/4
B-15	200-2000	16-166	15	7/8	2

### TOOL BOX DISPLAY

Cat. No. 88320

Black enamel display sells tool boxes on sight. Takes little floor space. Puts 4 boxes where they can be seen and sold. Includes boxes: 81615-91, 81616-91, 81617-91, 81704-91. (88611 - display only)

# location

Utica's facility of 300,000 square feet houses manufacturing headquarters for pliers, sockets and

wrenches, drive tools, socket and wrench sets, torque products, special purpose tools and saw blades.

## HAND TOOLS FULL LIFETIME WARRANTY

Each product carrying the trademark UTICA® /BONNEY®, except torque products, is warranted by Utica Tool Co., Inc. for the normal life of the product to be free from any defect in material or workmanship.

Any product failing to conform with this warranty should be sent to Utica Tool Co., Inc., Cameron Road, Orangeburg, South Carolina 29115, Attention: Superintendent of Quality Control [or to the distributor of UTICA® /Bonney® tools nearest you]. If inspection reveals that the product does not conform with this warranty, the product will be repaired or replaced, at the option of Utica Tool Co., Inc., without charge within 10 days of receipt of the product by Utica Tool Co., Inc.

This warranty does not extend to torque products or to any product which has been altered or abused.

ALTERATION: grinding, filing, heating, welding or other modification.

ABUSE: improper or unreasonable use, as hand sockets used with an impact gun; use of "cheaters" producing excessive leverage; hammering upon non-striking face tools.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
